

# Crawler Mobile Jaw Crusher

Operating Instruction

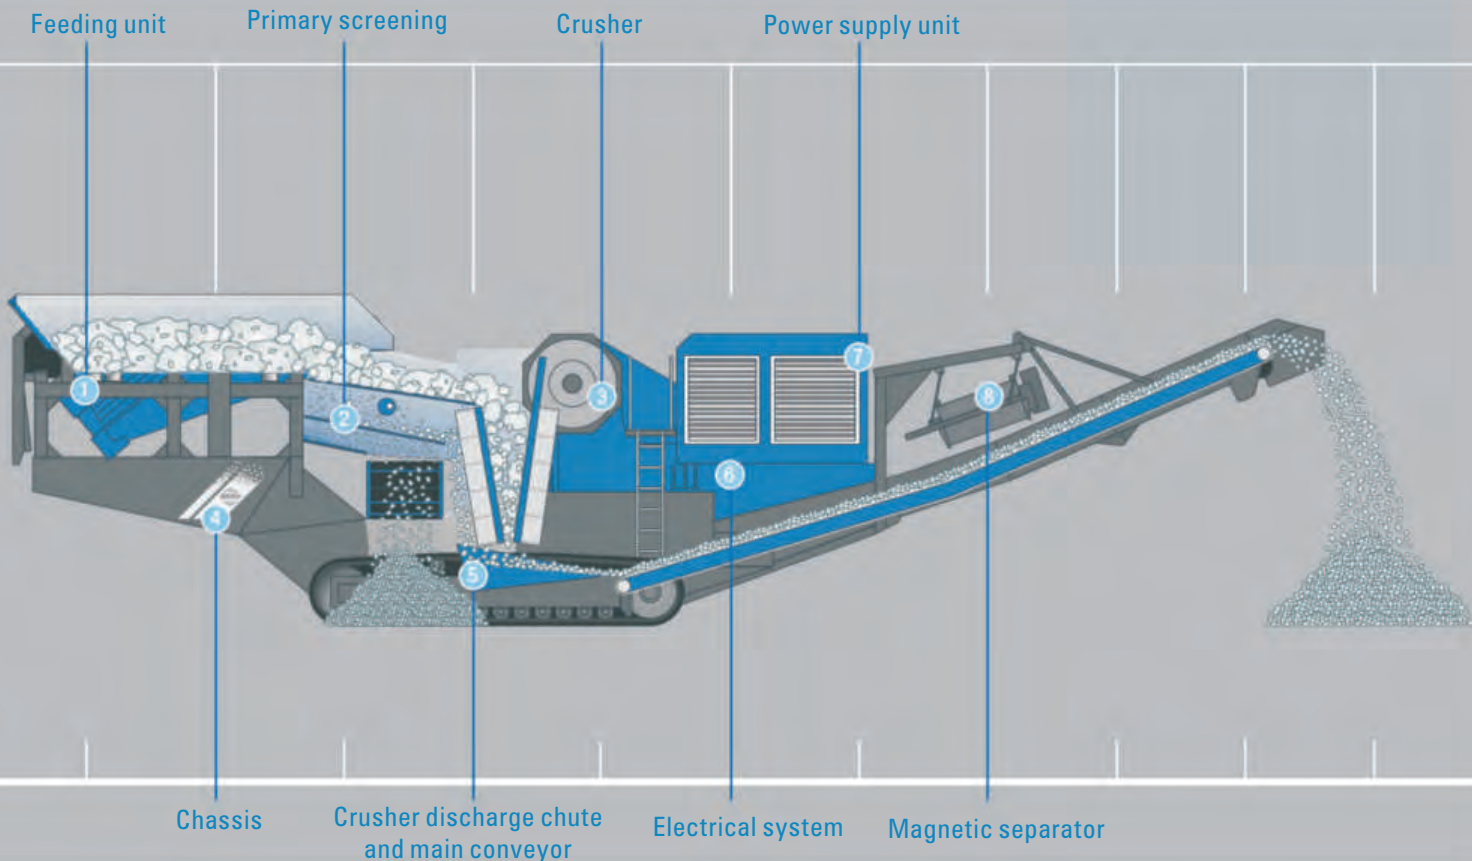

Henan Shibo Heavy Machinery Co., Ltd.

## Overview

With long-term accumulation of experience and recommendation from customers, our company targets customer perspective, and we can provide our customers with a complete set of solutions according to different requirements of customers

and feedback information of various site conditions, for each stage crushing, to optimize screening and conveying, to achieve the best configuration combinations to fully meet customer requirements.

## Crawler Mobile Jaw Crusher

## The Application and Function of Crawler Mobile Crusher:

1. The crawler-type mobile jaw crusher is widely used in mining, coal and cement industry for mining and crushing of hard materials;

2. The crawler-type mobile jaw crusher is helpful for recycling of construction waste, earthwork , urban infrastructure, roads or construction sites and other venues operations;

# Why choose us?

- 1 Light weight, small size, especially for work in narrow space.
- 2 The crawler-type mobile jaw crusher is multi-functional engineering machinery with compact structure, and the machine has different models with medium and small overall dimensions.
- 3 The crawler-type jaw mobile crusher is equipped with power pack - optimized design.
- 4 Easy to transport, crawler, with no damage to the road, with multi-function devices, wide adaptation.
- 5 The crawler mobile jaw crusher can climb, to meet requirements in mine, hydropower station, coal and other engineering industries.
- 6 The crawler mobile jaw crusher uses a two -layer structure to facilitate the screening of fine materials.

## Characteristics

Feeding size: 60-660mm

Applied material: concrete scrap, iron ore, copper ore, gold ore, manganese ore, gravel, granite, river stone, basalt, limestone, dolomite, quartz and coal.

Application area: mining, metallurgy, building construction, road, railways and so on.

## Working principle

According to materials type and the choice of coarse crushing, fine crushing and screening system, Shibo crawler-type mobile jaw crusher can work alone, also can be flexibly configured other machines. The crawler-type mobile jaw crusher is the integrated crushing and screening equipment, can do primary crushing of on-site material, eliminating the middle part of material transportation and greatly reducing the transportation costs of materials. The crawler-type mobile jaw crusher has flexible configuration and improved energy-saving systems, and it can reduce noise and dust and many other features, so the crawler-type mobile jaw crusher is an ideal choice for customers.

## Technical data

Items	FTM938E69L	FTM1142E71L
Vibrating feeder	ZSW-950×3800	ZSW-110×4200
Jaw crusher	P E600×900	P E750×1060
Main belt conveyor	B800×8.5M	B1000×9M
Discharging height of main belt conveyor(mm)	3200	3500
Side-opening belt conveyor (optional)	B450×3M	B500×3.5M
Discharging height side-opening belt conveyor(mm)	2800	3100
Power of genset(kw)	180	200
Transportation length(mm)	12000	13600
Transportation width(mm)	3100	3100
Transportation height(mm)	3650	4500
Transportation weight(t)	43.5	59
Working length(mm)	12100	13500
Working width(mm)	3100	3100
Working height(mm)	4100	5100
